TO,

**Indigram Labs**

Dear, **Indigram Labs**

I am writing to request funding for Bio-CNG Plant. Our Organization's Vision, We wish to provide solutions that are increasingly responsive to the needs of the world we live in. Acting to enhance and optimize natural resources, recover waste materials and protect the environment is an honor we experience every day.

The project we are proposing is BioCNG, also known as biomethane, is a renewable and clean-burning transportation fuel produced by upgrading biogas to natural gas quality. It's essentially purified biogas, made from organic waste materials like: Agricultural waste: Crop residues, straw, manure. Food waste: Spoiled food, leftover scraps, dung of animals.

The overall project capital is 50.00cr. Within that we are seeking equity capital funding as 15.00cr and balance 35.00cr.is debt from financial institution. This total amount will be used to cover plant and machinery, staffing, materials, working capital expenses or other cost.

We have a solid plan for the successful implementation of this project. Until now, we have registered our company, received LOI from the Indian oil company and are taking a variety of government permits.

We would be happy to provide additional information about the project or our organization upon your request. We believe that this project has the potential to make a significant impact and your support would be greatly appreciated.

Thank you for your time and consideration of this matter.

Sincerely,

**Director**
